

Marc Doe

SOFTWARE ENGINEER

Amsterdam, Netherlands | +31 687 22 11 44 marc@gmail.com | [in](#) marc | marc-k.  |

SUMMARY

Software engineer with experience in backend development, API integrations, and automation tools. Obsessed with finding better ways to automate workflows and improve efficiency. Skilled in building scalable, user-focused solutions through hands-on development in Python and Kotlin and RESTful APIs, while collaborating closely with product and engineering teams. Passionate about using technology to simplify complex processes and drive product excellence.

WORK EXPERIENCE

Software Engineer, TomTom, Amsterdam

Oct 2024 — Sep 2025

Delivered CES 2025 flagship demo: Developed and maintained demos that demonstrated how to customize maps easily using the TomTom software stack. Successfully delivered for CES 2025 event and continued using it for other company events.

- Took ownership of the project, working closely with design and marketing teams and key stakeholders across the company to ensure the technical setup aligned with the messages and goals of the demo.
- Built a dynamic web interface using *Node.js* and *Flask*. Implemented a *state machine* to make the demo flow clear, reliable, and maintainable.
- Integrated the Map-Maker tool into the app, using *okHttp* (*Kotlin*), enabling live customization of the map styles during presentations.
- Was nominated for promotion to Software Engineer II, recognizing technical impact and cross-team leadership.

Software Engineer Intern, TomTom, Amsterdam

Mar 2024 — Sep 2024

- **Cut feedback triage time by 80%** by creating and deploying a company-wide Slack bot (Python, Slack-Bolt, OpenAI API), to automatically categorize feedback from 2,000+ Slack users and three channels and generated categorized Jira-tickets.
- Improved **AmiGO App** by delivering new features and fixing bugs, applied Redux-Saga (React-Native) for side-effect management

Quality Assurance Officer, OMNIPHARMA, Beirut

Jun 2015 — Sep 2019

- Submitted daily reports, addressed safety deviations, and took corrective actions.
- Developed an Excel automation tool (VBA) that reduced data entry time by 70%.

PROJECTS

Pong Game (Fastify, tRPC, SQLite/Drizzle):

- Developed the backend for a multiplayer tournament game using Fastify, tRPC, SQLite/Drizzle ORM, and JWT.
- Implemented real-time gameplay and event handling with WebSockets (tRPC subscriptions).
- Designed scalable APIs, database schemas, and secure authentication flows in a monorepo architecture.

Webserver (C++):

- Built a non-blocking HTTP server in C++ that handles *GET*, *POST* and *DELETE* requests. and serves static files or dynamic content using CGI.

ADStore (iOS, Swift, GCP):

- Engineered and designed a secondhand marketplace app with real-time chat and listing functionality.
- Integrated Firebase for authentication and backend, and implemented core features including chat, favorites and notifications.

TECHNICAL SKILLS

- **Languages:** Python, C, C++, Swift, Kotlin, Java, TypeScript.
- **Framework & Libraries:** React Native, Redux-Saga, CocoaPods, UIKit, Core Data, Flask, Slack-Bolt, Fastify
- **DevOps & Databases:** GCP, AWS, Git, PostgreSQL, SQLite, Docker, Jira API, REST APIs, OpenAI API, Docker, GitHub Actions
- **Architecture:** MVC, MVVM, tRPC

EDUCATION

Bachelor's in Software Engineering, Codam Coding College, Amsterdam

Sep 2022 — Sep 2025

Codam is a full-time software engineering school, part of the international 42 network. It offers a feedback-driven, project-based education focused on hands-on learning, student collaboration, and self-reliance, with code reviews, evaluations, and testing culture.

Mobile Application Development, Notre Dame University Louaize, Beirut

Feb 2017 — Sep 2018

A diploma that provides students with the required knowledge and expertise to develop appealing mobile applications.

- iOS (Swift), Android (Java).
- PhoneGap / Hybrid Application (HTML5, CSS, JS).

Mechatronics Engineering, Electrical & Electronic University, Aleppo

Sep 2010 — May 2014

- The Logic of Code, Data Structure
- Fundamental to C++

COURSES & Certificates

Forward Program, McKinsey

Mar 2025 — Jun 2025

iOS Developer Program, Udacity

Jul 2023 — Feb 2024

Android Developer Track, Udacity

Aug 2018 — Aug 2018

ADDITIONAL INFORMATION

- **Languages:** English, Dutch, Arabic.
- **Interests:** Reading (self-development, business), Learning new programming languages, Swimming, Bouldering
